

Care Stream Export Instructions

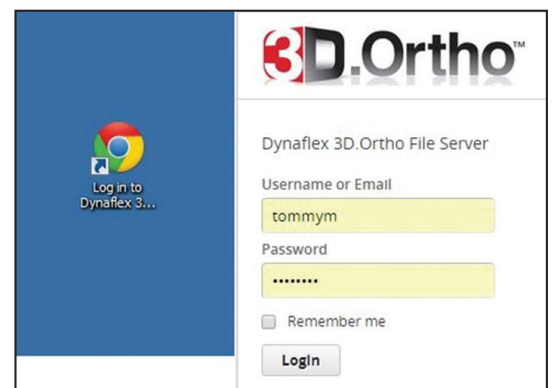

1. Open **CS OrthoTrac Software** and locate the patient.
2. Right click the **"Interoral 3D Models"** option and select **"Export to STL"** from the left-hand panel.
3. Select your export location, i.e. desktop, and **pair the STL files** with the filled out RX.

4. Pair the Rx together with the STL files in a folder with the **patients name** (last name, first name).

5. Double click the shortcut to the **DynaFlex® Egnyte Portal** or go to DynaFlex.egnyte.com to upload your case.

For instructions on how to submit your completed case,
view the [Submit Your Case PDF](http://www.dynaflex.com/3d-ortho/) online at www.dynaflex.com/3d-ortho/
